**SeamlessMD**
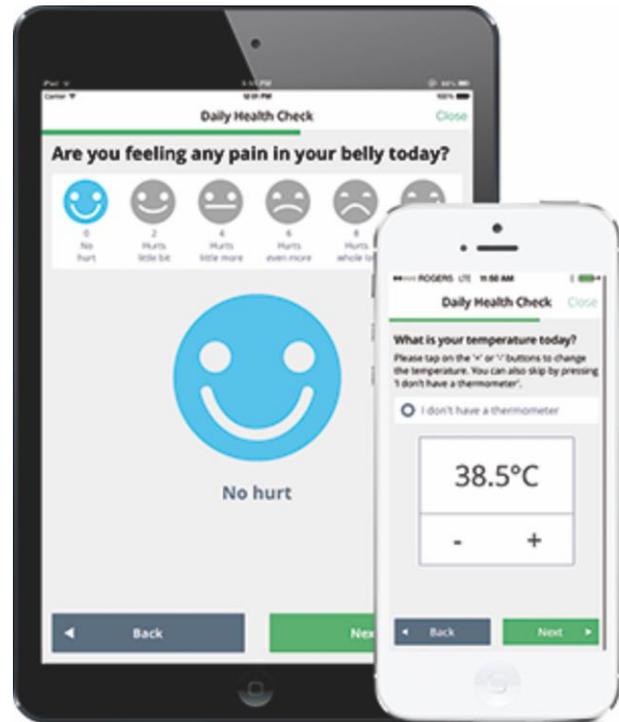

# Job Opening: Quality Assurance Engineer

### Us:

We are a health technology company that is reshaping the way patients travel through surgery. With over $27 billion dollars spent on hospital readmissions each year in North America, we know there is a better way.

We help healthcare providers improve patient care and lower costs by providing a "virtual companion" for patients on smartphones, tablets and computers. Our platform delivers timely reminders and interactive education, captures important patient data and monitors for early warning signs of complications. We provide this patient-generated data back to health care providers in beautiful and insightful ways, enabling healthcare providers to monitor patients remotely and perform advanced analytics to improve population health.

We already work with leading clinics, centers and hospitals in Canada and the U.S., which means your efforts directly contribute to improving the lives of patients everywhere.

We are funded by some of Canada's most prominent executives, investors and digital health entrepreneurs, and have been named a Forbes 30 Under 30 in Healthcare and one of the Top 20 Hottest Innovation Companies in Canada.

Our main office is at MaRS, Canada's leading ecosystem for healthcare, science and technology. You will find yourself immersed in a culture that is fun and relaxed, but passionate about startups, healthcare and building something great. We offer flexible work hours, a competitive salary, stock options and the opportunity to make a significant impact on the health care system.

### You:

- Are a well-rounded person with a passion for building a better world
- Have a passion for building robust and mission critical software that will be used in an enterprise setting
- Enjoy working in a fast paced environment with potentially changing requirements
- Are self-motivated and able to work independently
- Detail-oriented and works well in established processes

# SeamlessMD

**At SeamlessMD, you will:**
- Translating clinical protocol into modules on the platform that will have a direct impact on patient care
- Perform end-to-end testing to ensure product quality before launches in hospitals/clinics
- Communicate completed work effectively to rest of the team
- Be immersed in an exciting startup culture, interface with medical professionals, and share our vision in creating a better healthcare system for everyone

## Qualifications
Soft Skills
- Clear communicator (written and verbal)
- Creative solving of technical problems
- Ability to focus on deadlines and deliverables
- Ability to think abstract

Technical Skills (asset to have, but you can learn on the job):
- HTML, CSS
- Javascript
- Ruby on Rails (or other MVC frameworks)
- Web services (REST)
- Github
- Agile development methodologies

Other Non-Technical Skills:
- Strong sense of purpose
- Experience or interest in health care
- Relentless pursuit of success
- A clean criminal check

## Time commitment
- Part-time to Full-time

## Apply
If you are ready to join us and build the future of health care, please email a one-page and github account to [careers+dev@seamless.md](mailto:careers+dev@seamless.md).

## Timeline
Please apply by January 30th, 2015.
